

Class of 2024 Parent Coffee

What we are seeing this year...

How students are coping...

Current Culture of Parenting

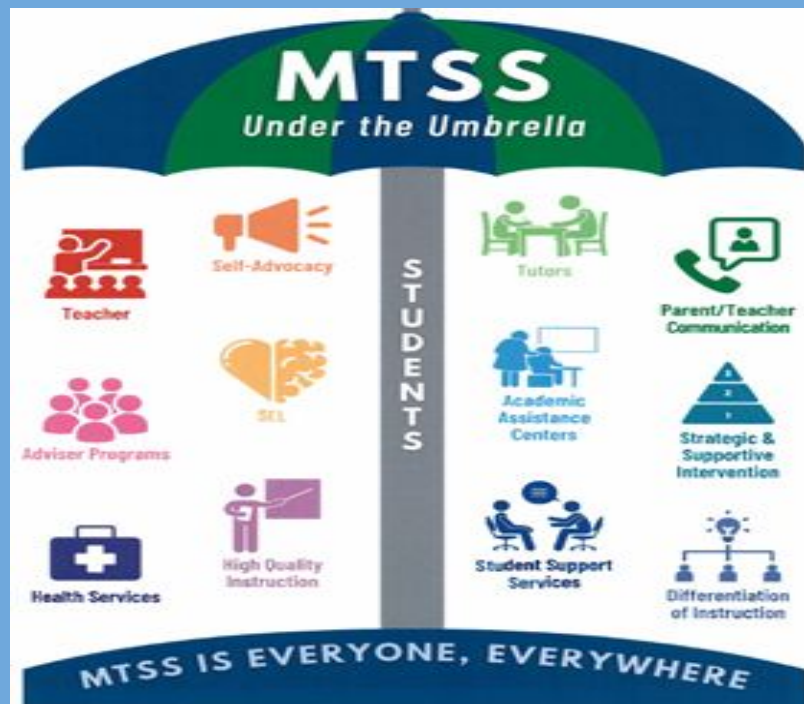

Some suggestions for parents.

Some suggestions for parents.

- Embrace pain points for your students and help them move through them rather than trying to make them go away
 - What happened?
 - What do you think about this situation?
 - Have you talked it over with your friends?
 - What ideas do you have to handle the situation?
 - I have some ideas that I could share with you. Are you interested in hearing those? Helping students tap into resources rather than jumping ship.
 - (If not,) Your adviser might have some ideas, would you be open to reaching out to him/her? Or, is there another person who you want to ask for ideas?
